

Activity: Parts Darts

AIM - to be the first player to get a total of exactly 5 points.

Players take turns dropping one dart (pencil) from shoulder height. They may either add or subtract this amount to/from their score. Darts inside the light grey area score the fraction shown for that section. Darts that land on or outside the black area do not score. The small circles in the middle are the 'bullseyes'. The scoring for the bullseyes and for the inner and outer red and green rings is shown in the scoring box.

Example: The scores for the four darts shown are:

Dart 1 = 0

Dart 2 = $\frac{3}{10} \times 2 = \frac{6}{10}$ or $\frac{3}{5}$

Dart 3 = $\frac{3}{10}$

Dart 4 = $\frac{3}{10} \times 3 = \frac{9}{10}$

Scoring:

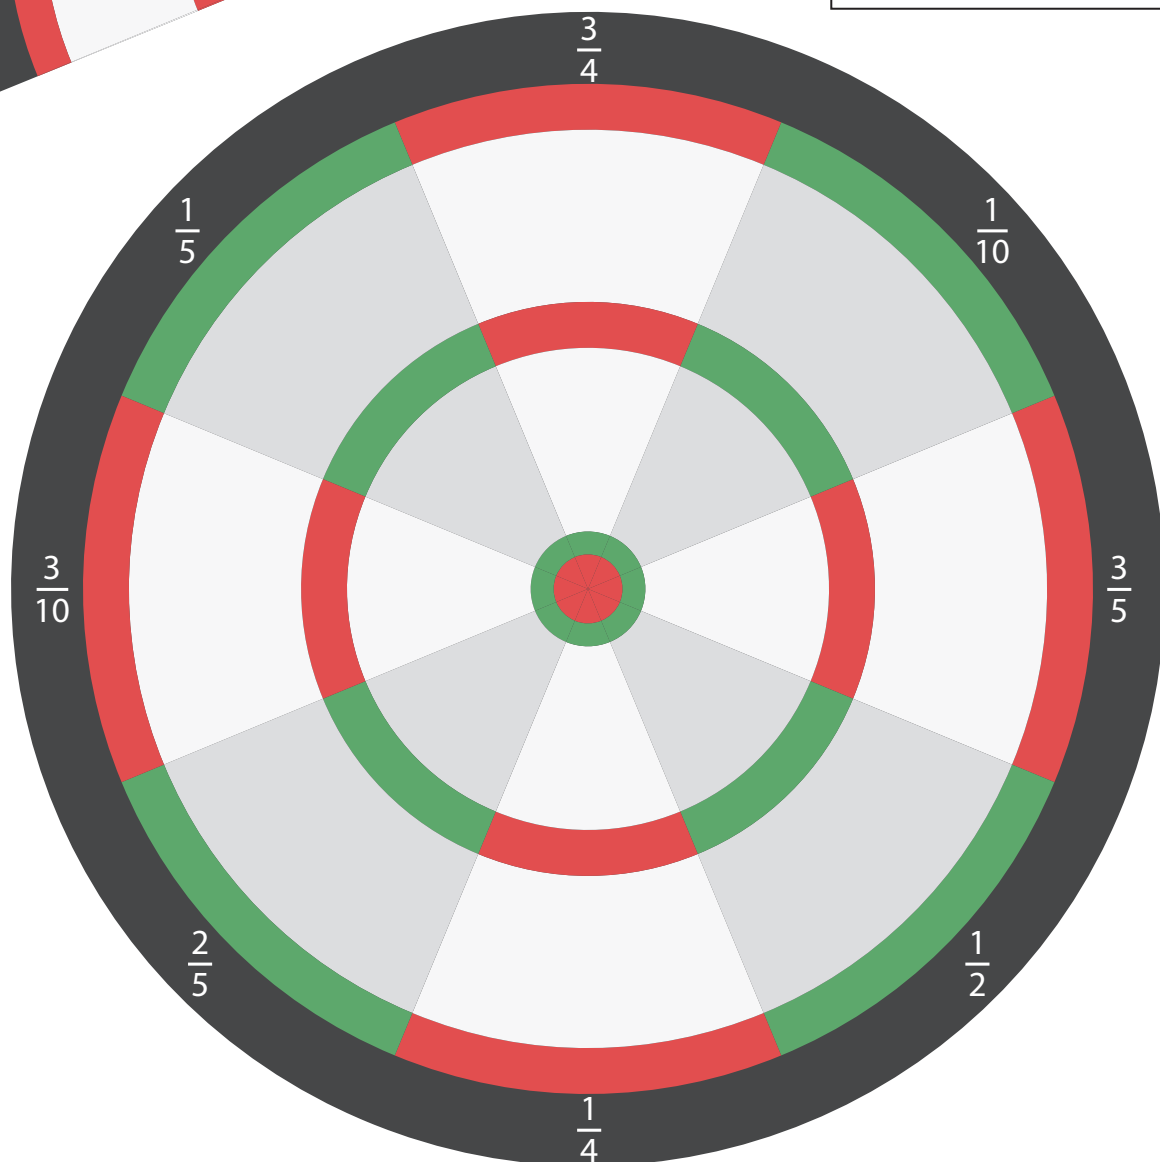

Inner Red Bullseye = 2 points

Outer Green Bullseye = 1 point

Inner Ring = triples dart value

Outer Ring = doubles dart value

For a dart landing on the edge of two sections, players can choose the score they prefer.
